OXY-KLEEN

Vanadium Stain Remover

Oxy-kleen is a concentrated vanadium removal formula that targets stains caused by vanadium (metal deposits) on brick, concrete and masonry surfaces. Fast and effective cleaning action allows most stains to disappear immediately. For best results Walltech Neutraliser should be used immediately after treatment.

Directions Apply directly to the surface being treated. In most cases the stain will disappear immediately. For difficult stains allow extra time before hosing off with plenty of water. Always test on a small obscure area first and avoid contact with other surfaces. Windows, frames and doors should be covered with plastic sheeting to avoid damage to surfaces. Neutralise surfaces with Walltech Neutraliser after treatment.

Advantages Oxy-kleen is a complex combination of inorganic acids and acid salts that enable removal of stains and deposits that can not be readily removed by conventional brick cleaning products.

Description **clear colourless solution**
Packaging **20 Litre, 200 Litre, 1,000 Litre IBC**
